

ALBERT CASTRO ALBACETE

Web Developer | www.albertcastro.es

www.linkedin.com/in/albertcastro | albertus1291@gmail.com

Castelldefels, Barcelona | +34 684 14 22 15

Junior Web Developer with experience in full-stack projects using React, Node.js, Express, and Supabase. Graduated in Web Application Development (DAW) with honors, and gained hands-on React experience during my internship at Kennwort Consulting & Technologies. Recognized for an analytical mindset, creativity, and strong problem-solving skills developed over a decade in the automotive technical sector. Seeking to join a team where I can continue growing as a Frontend or Full-Stack Developer, contributing with clean, scalable, and user-focused code.

SKILLS

Frontend: React, JavaScript, HTML5, CSS3, SaSS, Tailwind

Backend: NodeJs, Express, MongoDB, MySQL y Supabase

Development Environment: Visual Studio Code, Git, Github, Vercel

PROJECTS

CRAFT IT | Full Stack Web App

Full-stack web application for shortening and managing links, featuring authentication via Google and GitHub OAuth. Includes data export in JSON format, protected endpoints, and responsive design. Deployed on Vercel.

AI-TRANSLATOR | Web App with OpenAi API

Intelligent translator that detects the input language and automatically generates translations using the OpenAI API.

NODE JS CHAT | Real time chat

Chat application with automatic message cleanup every 15 minutes. Implements real-time sockets and MySQL database persistence.

WORK EXPERIENCE

KENNWORT CONSULTING & TECHNOLOGIES | Jul 2024 - jul 2025

Developed code in WordPress and React environments, participating in the full development and maintenance cycle of corporate web projects.

Implemented UI/UX designs for access control and capacity management platforms, ensuring a smooth and responsive user experience.

Optimized client record management and user registration functionalities in a public awareness campaign, improving data workflow efficiency.

Integrated access systems using ID, proximity cards, and QR codes in the "Gestiona" project, expanding the versatility of the access control system.

Collaborated in the development of new internal features and issue resolution, using Git and Scrum agile methodologies in coordination with the technical team.

EDAG Engineering Spain | Mar 2014 - Jan 2024

Prototype Clay Modeler.

Led teams of 3 to 5 technicians in the development of full-scale prototypes and models for brands such as SEAT, CUPRA, Porsche, and Audi within the VAG group. Implemented improvements in modeling processes, optimizing production times for Volkswagen.

Coordinated the technical execution of the Bentley Bacalar model in collaboration with the EDAG Fulda team in Germany.

Participated in the creation of high-end show cars, including the CUPRA Dark Rebel and Lamborghini Egoista, working closely with industrial designers.

Developed leadership, attention to detail, and complex problem-solving skills, directly applicable to software development environments.
